6/25/2001

Dear Hal,

Good to talk to you again.

The anadarko is from James Ellroy's 3rd novel, previous Novel of the Forties, "The Cold Six Thousand."

I read Dave Eggers on The Art Book Show. He implies The Zapruder, The Muskmelon, and Willis Films make a total.

His novel theories probably explain why his book is having editorial problems.

Best Wishes,

Ed Williams
